Organisational information for the course

Abstract

The course "Leadership in IT" is designed to provide a comprehensive overview of effective leadership practices within the context of information technology. It covers a wide range of topics essential for aspiring IT leaders, including strategic leadership, self-awareness, change management, crisis handling, motivation, ethical leadership, foundational leadership theories, **team dynamics**, personal development, mentoring, communication skills, emotional intelligence, and global leadership challenges. Each session's pre-reading material equips students with the necessary knowledge and tools to understand and develop crucial leadership skills, adapt to rapidly changing technologies, manage diverse and cross-cultural teams, and uphold ethical standards in complex scenarios. The course aims to prepare students to effectively lead IT teams by fostering a deep understanding of the interplay between technology, individual behavior, and organizational goals, emphasizing a blend of strategic thinking, personal growth, and practical leadership applications.

- Introduction to leadership theories** Covers various leadership theories, including trait, behavioral, contingency, transformational, and transactional theories, and their relevance to IT leadership and critical thinking.
- Knowing and developing self** Emphasizes the importance of self-awareness in leadership, utilizing tools such as personality tests, feedback mechanisms, and mindfulness to enhance understanding of personal traits and behaviors.
- Mentoring** Highlights the role of mentoring in leadership, emphasizing qualities like expertise, empathy, and commitment to the development of others.
- Communication and emotional intelligence** Discusses the significance of effective communication and emotional intelligence in leadership, impacting **team dynamics**, conflict resolution, and the ability to inspire and motivate teams.
- Team** Focuses on the effectiveness of team cooperation, the importance of clear communication, defined roles, and group dynamics in achieving collective goals.
- Ethical leadership** Details the importance of ethical standards in leadership, including integrity, accountability, and the adherence to regulatory and ethical norms, particularly in relation to data privacy and ESG regulations.
- Change Management and Adaptability** Outlines approaches to managing organizational changes, particularly in digital and AI transformations, stressing the importance of handling the human aspects of change to ensure successful adoption and implementation.
- Leadership in a global context** Addresses the challenges and strategies for leading in a globalized business environment, including managing cultural differences, communication barriers, and fostering a unified company culture.
- Motivation** Discusses the impact of intrinsic and extrinsic factors on motivation, highlighting the importance of aligning team members' tasks with their skills and reducing cognitive load to enhance motivation.
- Strategic leadership** Focuses on setting long-term goals, aligning resources, and implementing steps to achieve organizational visions. A strategic mindset involves forward-thinking, seizing opportunities, and managing risks efficiently.
- Crises Leadership** Explores leadership in times of crisis, focusing on rapid decision-making, effective communication, and the ability to manage stress and uncertainty. The use of structured approaches including various frameworks is highlighted.
- Personal development planning** Stresses the value of personal development plans for continuous growth, setting SMART goals, and regularly updating these plans to adapt to new challenges or opportunities.

Lecturers

[Miroslav Umlauf](#) and guests from companies and experienced leaders and mentors.

All materials (including photographs, images, and video sequences) presented in this course, whether directly uploaded to Moodle or linked, are subject to copyright and their use is allowed only for personal needs. According to § 30 of the Czech Copyright Law, any record, reproduction, or imitation of the work for personal use can be made, but it is not permitted to distribute or publish it further.

Additional information

There will be a dedicated Teams channel created for course participants which will serve for all official announcements, assignments, and cooperation. There will be pre-read materials (e.g. case studies) shared before and during the course. Timely submission of assignments, their quality and attendance of in-person sessions are critical for successful completion of the course.

Tento studijní materiál vznikl za podpory Evropské unie, Next Generation EU v rámci Národního plánu obnovy České Republiky v projektu Modernizace a digitalizace Vysoké školy ekonomické v Praze.
